Please Note: We have no plans for an update at this time. The current editions of Preston's Guide; on CD-ROM, via InterNet Subscription or the Twin-Volume printed Guide all have listings that end with the 2005 model year. We continue to be optomistic towards doing an update but there are several obstacles that must be dealt with, not the least of which is that the current printed Guide (our best seller) is already at its page count limit. Therefore, the current 2005 edition will be our ongoing basic edition and any updates (should there be any) will be separate supplements to it. We cannot guarentee that this Twin-Volume will always be available. So our advice is to get yours now while we have them in stock. Thank you;
George & Susan Monagle
